

# Sound Surfer // Sound Surfer Kiosk

## Sound Surfer & Sound Surfer Kiosk

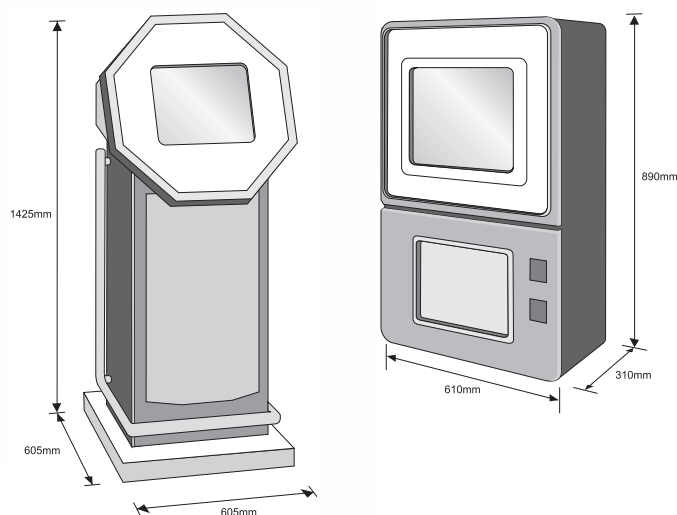

The Sound Surfer jukebox range is the most popular digital jukebox solution in the UK. Based on Sound Leisure's proven technology and available in either wall mounted jukebox or space saving kiosk style cabinets these products are brimming with features designed to attract plays.

Our Digital Audio jukebox range benefits from great features such as a user-friendly touch screen interface, 10 programmable background music timers with beats per minute control, categorised music genres, all the latest chart hits and a track load time of milliseconds.

For the operator all aspects of the units are programmable through the simple touch screen instructions (eg. Price of play, BGM timers, happy hour, time and date etc.) and all Sound Leisure's Digital jukeboxes exploit the additional revenue stream provided by on screen advertising. This utilises the jukebox touch screen as an advertising screen which can display any type of content as an attract mode advert.

### Features:
